# Classic Series

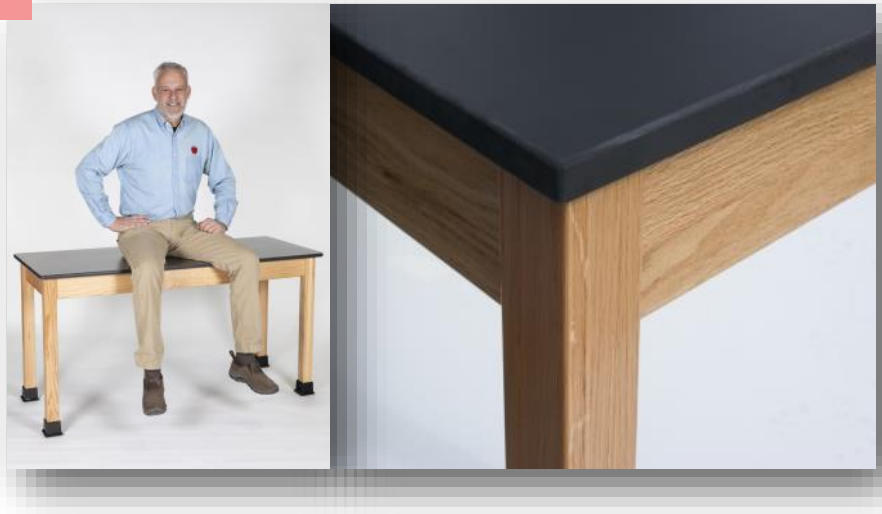

## Specifications

- Solid red oak table frame consisting of 2.25" square legs with PVC leg protecting boots (mechanically fastened), double hanger bolt corner design with 12 gauge steel corner bracket, each leg attached with (2) flanged nylock nuts.
- Aprons are 13/16" x 4" solid red oak.
- Clear wood finish is an industrial UV urethane that is chemical resistant.
- Glides are 1.5" diameter nickel plated steel adjustable to 1.5" for floor leveling purposes. Steel, felt, or nylon
- ADA compliance option relieves 2" from the front apron
- Table tops are mounted with mechanical and proprietary adhesive fastening.
- 15 Year Warranty – bar code product ID on every table ties into our computer system to the customer P.O., purchase date, and product ID.
- SEFA tested to 3000# (SEFA 8 Tests for tables).
- Ships KDF (knocked down flat), individually tray boxed, on narrow pallets for efficient handling minimizing freight damage with straightforward assembly at the job site. Assembly by factory trained personnel available.

## Options

- **Top Materials:**
  - EPX -Solid epoxy resin 3/4" or 1"**  
(heat and chemical resistant)
  - SPR -Solid phenolic resin, 3/4" or 1"**  
(chemical and scratch resistant)
- **Castors—C4 or C2**  
(4 swivel double locking or 2 fixed)
- **GFCI Electrical Outlets**  
(1-4)
- **Book Box option**
- **Lower apron and stretcher**  
(recommended with caster option)
- **Greenlaw overhead rod assembly**
- **Phenolic apron on student side**  
(graffiti resistant)

PEPCO Inc. started producing durable science and art tables for schools in 1989. We pride ourselves in offering a quality product with a 15 year warranty. We sell factory direct and through specialized dealers to ensure a competitive price - and the best value for your unique application. Over the years, we have expanded our experience and expertise so that we can envision, design, build and install nearly any type of classroom furnishing or configuration you can conceive of. Not sure exactly what you want or need? Talk to our designers and let us help you round out your vision of what's possible.

At PEPCO we work hard to stay ahead of our business growth curve. This helps us stay on time and on budget for our customers. Our recent plant expansion and the addition of computer-controlled machines to fabricate table tops and frames has cut our lead times. This means customers receive their orders faster.

With the expansion of our capability as the updated facility has gone online, we have diversified wood operations to include casework furniture production for science and art including lab service islands, peninsulas, casework, mobile labs, and storage cabinets. Whatever you can dream up for better utilization of your classroom space, we can make it a reality. PEPCO tables and furnishings are crafted from only the finest materials available. Built in the USA by an all American workforce, our furniture is testimony to proud American traditions of hard work and craftsmanship. Our lean manufacturing techniques allow us to provide high-quality products at a true value price to our customers -- schools and educational organizations trying to do the most important work there is within limited budgets.

We also strive to be as environmentally friendly as possible, using local products and vendors whenever possible. We utilize geothermal heating of our plant and facilities and are always mindful to minimize waste. We guarantee that our products will have the lowest life-cycle cost in our industry.

PEPCO is a family owned and operated company with old school values like answering the phone, responding to quotes and questions in a very reasonable timeframe, adjusting on the fly to budgetary needs and concerns. It's just the way we do business and we feel it's the right way by helping be good stewards of our tax dollars—Dave Patton, co-founder.
